EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lauren Sliger on July 5, 2006.

The application has been amended as follows:

Replace claim 1 with the following claim:

1. A method of treating a human patient with a condition of lipoatrophy, which comprises administering to the patient a dose of leptin, leptin analog or leptin derivative effective to treat the condition of lipoatrophy.

Replace claim 29 with the following claim:

29. A method for treating a patient with a condition of lipoatrophy, comprising administering to the patient a pharmaceutical regimen comprising a combination of protease inhibitor and leptin, leptin analog, or leptin derivative effective to treat the condition of lipoatrophy.

Replace claim 30 with the following claim:

30. A method for treating a patient with a condition of lipoatrophy, comprising administering to the patient a pharmaceutical regimen comprising a combination of leptin, leptin analog, or

Art Unit: 1646

leptin derivative and at least one compound selected from the group consisting of thiazolidinediones, fibrates, statins and metformin, wherein the regimen is effective to treat the condition of lipoatrophy.

Replace claim 31 with the following claim:

31. A method of treating a human with a metabolic abnormality associated with lipoatrophy, comprising administering leptin, leptin analog, or leptin derivative at a dose effective to treat the metabolic abnormality associated with lipoatrophy.

Cancel claims 22 and 32.

In the specification on page 1, first paragraph, insert – (now abandoned) – after “10/279,129, filed October 22, 2002,” – .

The following is an examiner’s statement of reasons for allowance: due to the unpredictability of the effects of leptin on humans taught in the art, one of ordinary skill in the art would not have reasonably expected that administration of leptin to patients with a condition of lipoatrophy would result in marked improvement of the lipoatrophic condition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
